

KeySafe™

Key Management Solutions

Store keys away safely for when you need them.

Kidde KeySafes provide key management solutions to allow convenient access and storage inside and outside of the home, business, construction sites, vehicles and trailers.

Home and Family

Homeowners use KeySafe™ storage products to store physical keys where they are needed. Convenient key access prevents family members from being locked out. Keyboxes with push-button codes provide access for cleaning and maintenance crews, caretakers or other individuals that need access to homes - just change the code when the job is done. Portable key storage is also great with children for after school access, to keep keys with vehicles for extra drivers or to prevent lockouts while on vacation.

Property Management

Streamline operations with KeySafe™ storage products to manage the right to enter properties. Key storage solutions will facilitate entry for service and maintenance crews, tenants or delivery services. The expense and inconvenience of duplicating and dispensing keys is eliminated.

Vehicle

Vehicle owners use KeySafe™ storage products to store physical keys when they are needed. The permanently mounted key storage includes a protective weather cover to keep the unit clear of road grime and debris. Mount into wheel well, onto frame, tow hitch, trailer tongue and more.

All KeySafe™ models have codes that can be changed any time for added security. The interlocking faceplate prevents tampering and unauthorized use. The key safes are constructed from solid metal to withstand rain, snow and freezing conditions.

Custom Packages and Imprinting Available

Simply attach the key safe to any wall or flat surface, door, gate or hide it away for safe keeping.

KeySafes Offer Multiple Uses:

- Prevent lockouts
- After school access for children
- Emergency access to households
- Marine use for boat trailers
- Clips to automobiles

Trusted by property managers and contractors for over 50 years.
