

U.KONSERVE®

WHY

U.KONSERVE®?

- reusable and waste-free
- high quality materials
- non-toxic and non-leaching
- free of BPA, phthalates, PVC and lead
- 304 grade stainless steel
- leak proof containers
- recycled materials

What Makes These Products Unique?

- **Reusable and Waste-Free** – Products are designed to reduce the staggering amount of trash that ends up in landfills and oceans every year because of food packing.
- **Sustainable Design** – High-quality, non-toxic materials designed to be durable and long lasting, and to minimize waste throughout each product's life cycle.
- **Non-Toxic and Non-Leaching** – Tested by independent labs to meet strict safety standards. All of the products are free of BPA, phthalates, PVC and lead.
- **Recycled Materials** – Only use recycled cotton and all of the insulated fabrics are made from recycled plastic bottles.
- **Functional and Practical** – Offer products for kids and adults. Ideal for lunches, travel, picnics, takeout, salad bars, refrigerator storage and more! They're leak-proof, easy to clean and easy to pack and store.

Products are designed in California and responsibly made in China, India and Taiwan in facilities that are working toward green practices and supportive of the mission to reduce waste.

U•Konserve has been shown in these magazines to name a few:

Why Should I Go Waste Free?

- **Reduce Waste** by eliminating disposable food packaging from landfills and oceans
- **Save Money** by reducing single-use packaging and packaged foods
- **Eat Healthier** by packing homemade, non-packaged foods
- **Store Safer** by packing food in non-leaching, non-toxic containers
- **Promote Sustainability** by giving gifts that send the message of reuse

Did You Know About These Environmental Facts?

- On average, a school-age child using a disposable lunch generates **67 pounds** of lunch waste per school year (**18,760 pounds** of lunch waste per elementary school).
- A waste-free lunch saves on average **\$216** per child per year (versus a disposable lunch).
- Packaging accounts for nearly **32 percent** of all household waste in the U.S.
- Americans discard **2.5 million** plastic bottles every hour.
- **40 billion** plastic utensils are used every year in the U.S.
- Americans use **500 million** plastic straws every day. Placed end to end, the number of disposable straws used in the U.S. in the past 4 days could reach the moon.
- About **23 billion** coated paper or Styrofoam coffee cups end up in landfills every year. Placed end to end, they could circle the earth **68** times.
- Every year Americans throw away **100 billion** plastic bags. The average American family takes home almost **1,500** plastic shopping bags a year, that's more than **4** bags a day.

Why Use 304 (18/8) Stainless Steel?

- It's long lasting and durable so you're not spending money replacing your containers
- It's non-leaching, non-toxic and safe for food storage
- It resists stains and rust
- It's recyclable
