## STATIC V SLEEPING PAD

06SVGR01C

*Being both lightweight and rugged the Static V is an ideal sleeping pad for the avid backpacker to casual camper.*

## DOUBLE V SLEEPING PAD

06DVBL01E

*The popular Static V goes double-wide. With proven comfortable, lightweight, rugged performance and a wide 47-inch width the Double V is perfect for couples camping. It also comes with its own air pump / stuff sack.*

**Deep Weld Patterning:** Unlike traditional pads that flatten the bag's fill, Deep Welds create expansion zones that allow your bag to fully loft beneath you for improved thermal comfort.

**Body Mapping Technology:** Specially developed V-shaped design delivers superior support and comfort no matter how you sleep – on your side, stomach or back.

**Twist-Pull Valve:** Secure and simple, our valve allows for inflation in as few as 10 breaths, and opens wide for rapid, complete deflation. The mechanism creates a secure seal and helps prevent inadvertent opening

**Superlight Design:** Weighs only 18.1 oz., considerably less than other air mattresses and self-inflating pads of the same size, thickness and R-Value.

**Ultralight Material:** The 75D polyester material is the best combination of backcountry durability and ultra lightweight.

**Double-wide:** At 47 inches, the Double V is wide enough for two – or great if you want to really spread out.

**Body Mapping Technology:** Specially developed V-shaped design delivers superior support and comfort no matter how you sleep – on your side, stomach or back.

**Side Rails:** Integrated into the patterning and construction, side rails help provide a secure, comfortable sleep by centering you on the pad and inhibiting air movement while tossing and turning.

**Inflation Bag/Stuff Sack:** Each Double V includes an inflation bag that doubles as the pad's ample stuff sack.

**Rugged Material:** The 75D polyester material provides superior tear, puncture and abrasion resistance for minimal weight.

**Lightweight Design:** Weighs only 40.5 oz., considerably less than other two-person air mattresses and self-inflating pads of the same size, thickness and R-Value.

## INSULATED STATIC V SLEEPING PAD

06IVOR01C

*A comfortable backcountry pad providing winter insulation and all-season comfort, the Insulated Static V packs light and small and delivers an outstanding R-Value of 4.4. The body-mapped shape and V chamber design combine to maintain comfort and minimize air movement that can impact insulation. The chambers are filled with light, lofty Klymalite™ synthetic insulation to add another layer of protection from the cold ground, and dynamic side rails cradle you comfortably on your pad for a more restful sleep.*

## STATIC V LUXE SLEEPING PAD

06VLST01D

*The pinnacle of rugged luxury, Static V Luxe hits the sweet spot where comfort, technical performance, durability and lightweight packability come together. The 30-inch width provides room to roll, and dynamic side rails keep you on your pad. Ergonomic body mapping optimizes comfort and the V chamber design limits air movement to help maintain maximum insulating performance. This backcountry bed packs to about the size of a one-liter water bottle, inflates easily and weighs just 27 oz.*

## LUXE PILLOW

12LPGY01D

*The Luxe Pillow's design cradles your head for supportive, stable sleeping and the soft outer material delivers all night comfort. Great for casual camping and light enough for backpackers craving extra comfort. It's sized almost as big as your pillow at home, weighs just 6.2 oz. and packs surprisingly small for something so luxurious.*

## PILLOW X LARGE

12PLTL01D

*The advanced, self-centering X design positions and cradles your head for supportive, stable comfort. Weighing just 3.2 oz. and packing down to the size of a wallet, this technically advanced pillow is a luxurious necessity for backcountry travel – and it's great for car camping, too.*

# STASH 18 BACKPACK

12STRD01C

*Versatile, comfortable and weighing in at just 12 oz. the Stash 18 is a go-to pack for day hiking, bike travel and daily use around town. The unique Air-frame suspension uses air pressure to provide padding, load transfer and flexibility on the move. An integrated hand pump lets you adjust pressure on the fly to fine-tune comfort. The top loading design provides quick and easy access to gear and cinches closed quickly, securely and easily.*

# V SHEET PAD COVER

13PCGRSVC

*Simply the best accessory for your regular sized Static V sleeping pad. The V Sheet pad cover is removable, machine washable and includes a pocket that is perfect for an inflatable pillow such as the Luxe Pillow and Pillow X Large. When your V Sheet is dirty simply remove the cover and throw it in your washing machine and never worry about getting your Static V dirty again.*

# KSB 35 DOWN SLEEPING BAG

13KSBL35C

*When nighttime temperatures set in, enjoy the warmth of 650 fill-power down in the KSB 35. Right at home in the backcountry or the backyard, this bag features Length Locks™ that can shorten the bag, and a two-way zipper that allows you to open the foot box for ventilation or stand up in the bag. Unzip the bag all the way to convert it into a generous blanket.*

# TRAVERSE DOUBLE HAMMOCK

09HMBL01C

Introducing a new approach to hammocks with a diagonal stitch pattern that uses just two pieces of fabric instead of the traditional three-panel design. In addition to looking pretty cool, this creates a more comfortable, asymmetrical sleeping position as your body aligns with the seam. It also means less stretching and sagging over time. Includes two tree straps and carabiners.

# HAMMOCK V SLEEPING PAD

06HVGY01D

The Hammock V is the first air pad designed specifically for all hammocks, giving the sleeper 180° of insulation, significantly reducing the amount of lost body heat.

**Make it a package!** The Hammock V Sleeping Pad is combined with the Traverse Double Hammock for the perfect outdoor comfort package.

**Hammock Ready Design:** Specifically sized and patterned to provide comfort and no-slip security while sleeping in all hammocks.

**Patch Kit:** Included for emergency repairs, a patch kit comes stored in a small integrated pocket on the top of the pad's storage bag – already packed and always at hand.

**Anti-microbial Laminate:** A treatment permeates the inside laminate to inhibit the growth of microorganisms, including fungus and bacteria, that can cause odors and material damage.

**Storage Bag:** A storage bag sized specifically for your pad is included to maintain compactness and provide protection while traveling.

**Lightweight Design:** Weighs only 27 oz. and when going for lightweight is the perfect pair for any hammock.

# Engineered for Real Comfort

## Air Valve

Fast, easy inflation with an air-tight twist-lock

## Side Rails

Help you stay centered on your pad all night long

## Sleeping Bag Reservoirs

Maintain the loft, warmth & overall comfort of your bag

## V-Chambers

Lofted support at key pressure points keeps you off the ground from head-to-toe

## Patented Weld

Proven-tough design that's guaranteed for the life of the pad

# KLYMIT

Since 2007 KLYMIT has lead the industry in lightweight, compact, easy to use and durable gear. With four out of the past five years winning awards ranging from Backpacker Magazine, ISPO and gear junkie awards, in each of their product categories. Klymit consistently pushes the benchmark for the industry with regard to camping pads. Utilizing body mapping technology and loft pockets, Klymit has changed your comfort and performance expectations. Their camping pads are hands down the lightest and most compact in the industry.
