

Hitachi is proud to offer an exclusive 10-Year Lithium Ion tool warranty, beating the competition by 5 years.

HXP Lithium Ion batteries have up to three times the lifespan of a traditional NiCd battery, meaning it lasts 300% longer. The Hitachi protection circuitry monitors each cell contained within the battery pack. This ensures each cell is only charged to its optimal level. Once a cell reaches optimal charge level, the charging function to that cell is stopped to prevent overcharging.
